AMF BRUNS OF AMERICA

PROTEKTOR-System Wheelchair and
Occupant Restraints

www.amfbrunsamerica.com

The PROTEKTOR-System Wheelchair and Occupant Restraints solution provides critical stabilization for passengers in the event of a collision. AMF Bruns said the design rules out any wheelchair being secured improperly. The company developed the all-new Protektor Platinum Series after intensive crash tests that indicated the need for more robust retractors.

The PROTEKTOR occupant and wheelchair restraint system offers a number of variations. The Platinum Series is a heavy-duty, four-point wheelchair retractor system for wheelchairs and occupants. The company stated that it meets all the requirements of its users and the international standards.

For installation to the vehicle floor, the PROTEKTOR Silver System and the PROTEKTOR Black System offer four-stud fitting and smart fitting. For the fortification on the wheelchair, the system offers loops, hooks or carabiners.
