## Solution Designed to Protect Wheelchair Riders In Rear-End Collisions

    | Posted on October 25, 2016

AMF-Bruns of America's one-stop solution for protecting riders in wheelchairs in the event of a rear-end collision is a combination of two of the company's products:

- PROTEKTOR-System wheelchair and occupant restraints: A variety of wheelchair and occupant restraints that are designed to meet the latest international and national standards, including RESNA WC18, for wheelchairs with an integrated lap belt.
- FutureSafe head and backrest: An adjustable head and backrest system with an upper anchorage point for the shoulder belt that is

engineered to help ensure passenger security in a collision. This system meets RESNA WC18 and ISO 10542 standards, according to AMF-Bruns of America.
