

WE'VE GOT YOUR BACK!

Hand-controlled adjustment feature in new "automatic" head & backrest system provides maximum comfort by barely lifting a finger!

FutureSafe **AUTOMATIC** Head & Backrest / Seatbelt Anchorage

Meet the newest member of our wheelchair safety family of innovative products.

The new hand-controlled adjustment feature allows wheelchair passengers with upper extremity pain & discomfort to travel in comfort.

This innovative system allows customized head, back and neck adjustments. No more twisting and turning for maximum relief.

- Patented design meets all applicable regulations and can withstand 15G rear collision forces and 20G frontal collisions.

- Durable construction makes it easy to clean, move and install -- saving space when not in use.

- Compatible with AMF-Bruns restraint systems.

- Can be turned inward towards the vehicle wall when the vehicle is without a wheelchair.

- Can be either side-mounted or floor-mounted.
